carry more and save you
money.**

KENTUCKY TRAILER
A Servant Leader Company

Dry Freight Van

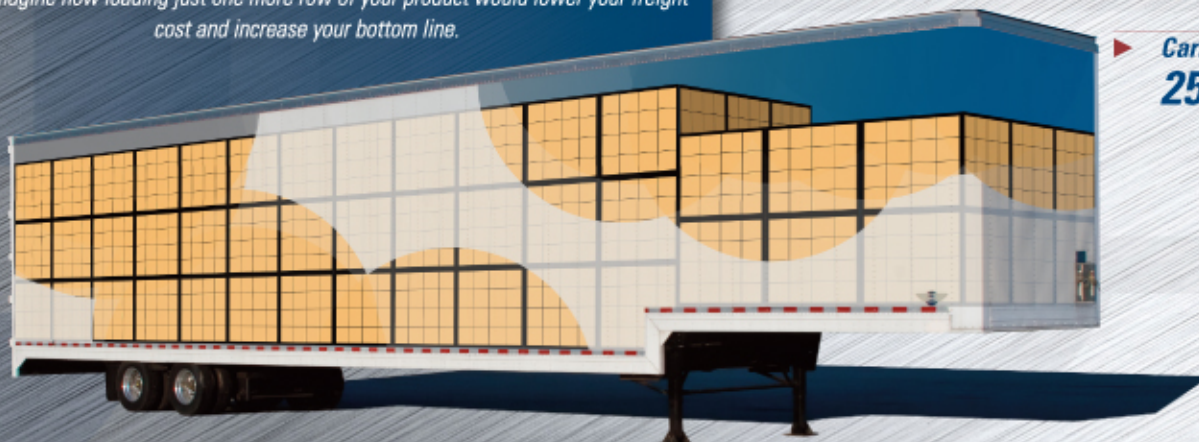

This is the most widely used trailer in the freight industry. Certain products are suitable for this trailer. However, for many products it is a very costly choice, in some cases wasting 5%-20% of cargo space with a comparable waste in shipping costs.

▶ Up to
20% wasted
cargo.

Electronics Van

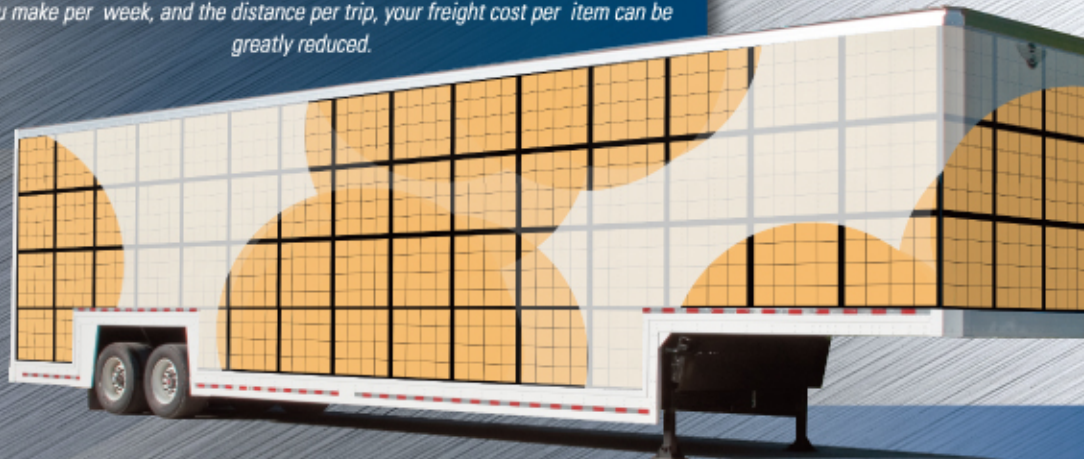

This unit may permit a 5%-25% increase in payload over a standard dry freight van, above. Imagine how loading just one more row of your product would lower your freight cost and increase your bottom line.

▶ Carry up to
25% more.

Drop Frame Van

This unit may permit a 20%-40% increase in payload. The lower floor height also makes for easier loading and unloading. Depending on the size of your product, the number of trips you make per week, and the distance per trip, your freight cost per item can be greatly reduced.

▶ Carry up to
40% more.
